Felix,

Task 6 of Task Order 1 (Toxics) and Tasks 6 and 9 of Task Order 2 (Pathogens and Nutrients) specify that the contractor shall submit all data (e.g. GIS, monitoring, modeling inputs/outputs, etc.) to the TOM upon completion of the TMDL support deliverables. The data must also be accompanied by an inventory list describing the all data used. GIS data must also include metadata files. The contractor shall also prepare in an electronic library of the administrative records containing documents that support the establishment of and calculations/allocation for each of the TMDL support document deliverables.

I think a lot of what Barbara is requesting is out of scope for the Task Orders I'm in charge of. Also note that this is level of effort work, so the work continues until the contractor runs out of money and not until they complete all the work - which may affect final items such as delivery of the modeling inputs/outputs data.

So the short answer is that I cannot provide her what she is asking for under my Task Orders.

- Antony
